MEMORANDUM FOR:

ATTENTION:

SUBJECT:

USSR Production of Advanced
Radar.

On 10 September the Central Intelligence Bulletin carried an item presenting additional evidence for believing that the USSR is undertaking large-scale production of advanced radars. The evidence was the import from Sweden of large quantities of special wire. [redacted] would appreciate knowing what kind of wire this is, the quantities, and the reason for your belief that it will be used only in the manufacturing of advanced radar.
